

OR1105 Anti-counterfeit label specifications

Introduction: Anti-counterfeit label is a universal anti-counterfeit and anti-channeling label, which uses double-sided adhesive technology and is generally stuck inside the product. The label is small in size, soft in material, and has good concealment. Combined with the unique code of the chip, it can help customers effectively combat counterfeiting and channeling problems.

Item	Parameter
Model	OR1105
Application	Anti-channeling, electronic anti-counterfeiting
Size	32*10mm
Material	PET & Double-sided release paper
RFID working protocol	ISO/IEC 18000-6C EPCGlobal Class 1 Gen 2
RFID working frequency	860~960 MHz (Global)
Chip	IMPINJ R6
Chip antistatic performance	Maximum 2000V
Data service	Provide chip data writing and surface printing services
Recognition distance	1~2 米 (Related to identification equipment and environment)
Package	10000pcs/ctn
Working temperature	-20~50℃
Storage humidity	20%~60%
